EDUCATION

Bandung Institute of Technology (ITB), Bandung
Computer Science

Aug 2023 – Present

Purwadhika Digital Technology School, Jakarta

Oct 2025 – Jan 2026

Data Analytics Professional Program | Final Exam: 85/100 | Final Project: 91.3/100

PROFESSIONAL EXPERIENCE

Central Bank of Indonesia, Jakarta
Data Scientist Intern

Jun 2026 - Aug 2026

- Researched and benchmarked forecasting models to determine the best-performing approach for foreign exchange (valas) supply-demand prediction.
- Built an AI-powered Summarizer tool for chapters in Annual Assessment books, streamlining internal review and reporting processes using Azure AI services.
- Conducted User Acceptance Testing (UAT) for Bank Indonesia's Internal Data Portal application to ensure functionality and data accuracy prior to deployment.

OSKM ITB, Bandung
Frontend Developer

May 2026 – Aug 2026

- Designed and developed responsive, high-performance front-end user interfaces and interactive onboarding components for the official OSKM e-commerce platform using Next.js, TypeScript, React, and Bun.
- Collaborated with cross-functional UI/UX and backend teams to deliver a robust, scalable web platform for university orientation.

PURWADHIKA DIGITAL TECHNOLOGY SCHOOL, Jakarta
Data Analytics Trainee

Oct 2025 – Jan 2026

- Executed end-to-end data analysis workflows, including advanced data cleansing, transformation, and Exploratory Data Analysis (EDA) using Python (Pandas, NumPy) and SQL.
- Applied inferential statistical methods, including Hypothesis Testing (A/B Testing, t-test, ANOVA) and correlation analysis, to validate business hypotheses and ensure data-driven accuracy.
- Developed interactive Business Intelligence dashboards using Tableau and Python visualization libraries (Matplotlib, Seaborn) to monitor KPIs and identify market trends.
- Synthesized complex analytical findings into compelling Data Stories, aligning technical insights with stakeholder needs to drive strategic decision-making.

PAKANSUPER MARKETPLACE, Bandung
Web Designer & Creative Strategist

Aug 2023 – Dec 2023

- Develop an innovative web-based marketplace for farmers and breeders, successfully selected as the only project to represent ITB at the campus fair.
- Oversaw all stages of project execution, strategic planning, team motivation, product design, and marketing resulting in strong team collaboration and high campus recognition for delivering real community impact.
- Spearheaded the UI/UX design and technical deployment of a digital marketplace, managing domain and hosting.
- Conceptualized the platform's brand identity and created all visual marketing assets for a successful launch.

HIMPUNAN MAHASISWA INFORMATIKA (HMIF) ITB, Bandung
Media & Information Division

Sep 2024 – Present

- **Key Role:** Managing digital content strategy and community communication for ITB Informatics students.
- **Event Documentation:** Led visual publication and documentation for major milestones: PEMILU HMIF 2025, SPARTA 2024 (Orientation), and the October Graduation 2024.
- Collaborated with cross-functional teams to produce high-quality multimedia assets for 1,000+ union members.

ACHIEVEMENTS

2nd Place Winner of Nitro Hackathon Universitas Muhammadiyah Purwokerto, Purwokerto May 2026

Creating a web app for distribution of KKN(Kuliah Kerja Nyata) students to the world of work/professionalism

Best Team as Web Designer & Creative Strategist Pakansuper, Bandung Dec 2023

Selected as the best Team among 9 teams 2023 & and represent the campus at bigger events.

CERTIFICATIONS

- **Data Analytics Skill Accelerator (Purwadhika)** Jan 2026
- **RAG-based Chatbot Workshop (InerCorp)** Des 2025

TECHNICAL PROJECTS

Applicant Tracking System (ATS) – Algorithm Strategy Capstone June 2025

- Developed a desktop application using Python (Tkinter) and MySQL to automate resume screening.
- Implemented Knuth-Morris-Pratt (KMP) and Boyer-Moore (BM) algorithms for high-speed string matching.
- Integrated Levenshtein Distance for fuzzy matching and Regular Expressions (Regex) for data extraction.
- Published on [Github](#)

US Airline Market Trend Analysis (1993 – 2024) Des 2025

- Analyzed a 30-year aviation dataset using **Python** to identify the impact of financial crises and post-pandemic shifts in passenger behavior.
- Designed a Tableau Story to visualize the transition of market dominance from business hubs to leisure destinations (Miami, Orlando).
- Formulated strategic business recommendations, such as "Price Lock" features and "Early Bird" promotions, based on seasonal price elasticity and inflation trends.
- Published on [Github](#) and [Tableau](#)

Research Paper

- Penerapan Sistem Persamaan Linear pada Sistem *Shot Meter Game* NBA 2K Published on [ResearchGat](#)
- Penerapan Kombinatorika dalam Menentukan Probabilitas Pack Opening FIFA Ultimate Team Published on [ResearchGat](#)
- Optimalisasi Penempatan *Wifi Access Point* di Apartemen Menggunakan Algoritma Greedy Published on [ResearchGat](#)

SKILLS

- **Technical:** Python (Pandas, NumPy), SQL, Java, C++, TypeScript, React, Next.js, Bun, WordPress, Regex, n8n
- **Tools & Platforms:** Tableau, Microsoft Azure, Figma, Excel, Git/GitHub, Postman, Web & Domain Management, Canva, Capcut, Power Point
- **Leadership & Soft Skills:** Strategic Planning, Team Coordination, Data Analysis, Data Storytelling, Academic & Scientific Writing, Problem Solving, Analytical Thinking, Detail-oriented.
